Yared Henriquez

Penetration Tester | Offensive Security Researcher | Applied AI Engineer

Cartagena, Colombia | +57 301 518 5270 | yared.henriquezb@gmail.com
Portfolio: dev101x.online | GitHub: github.com/DevCop95 (#18 in Colombia)
LinkedIn: linkedin.com/in/yared-dev | HackerOne: hackerone.com/Dev101x

PROFESSIONAL PROFILE

Systems Engineer, Offensive Security Researcher, and Penetration Tester (alias **Dev101x / DevCop95**) pursuing an M.Sc. in Artificial Intelligence at the Universitat de Barcelona. Official upstream contributor to **LOLBAS**, **Red Canary Atomic Red Team**, and **LOLRMM**, with defensive tooling formally cited by **The Chinese University of Hong Kong (CUHK)**. Experienced across enterprise penetration testing at Henkel, former CTO leadership in IoT/solar infrastructure, QA engineering as a Google affiliate (Extended Workforce), and autonomous AI agent architectures.

PROFESSIONAL EXPERIENCE

Penetration Tester | Henkel

2026 - Present | Switzerland (Remote · Part-time)

- Conduct offensive penetration testing, network security audits, and vulnerability assessments across corporate infrastructure and web applications.
- Validate security controls and deliver actionable remediation reports aligned with MITRE ATT&CK and OWASP methodologies.

Chief Technology Officer (CTO) | EXIA S.A.S

Jan 2022 - Aug 2025 | Cartagena, Colombia

- Directed technology architecture, IoT sensor integration, and real-time telemetry monitoring for solar photovoltaic operations.
- Automated core operational workflows and engineered executive decision dashboards.

Associate Software Developer (QA & Testing) | Google (Affiliate / Extended Workforce)

2021 - 2024

- Executed functional, regression, and automated testing across high-scale web and mobile applications.
- Collaborated with distributed engineering and QA teams to streamline delivery workflows in agile environments.

Offensive Security, AI & Fullstack Consultant | Independent

2020 - Present | Cartagena, Colombia

- Architect secure web applications (Python, Laravel, Vue.js), port calculation engines (Panorama EVO), and enterprise Salesforce integrations.
- Develop automated reconnaissance pipelines, DevSecOps review skills for AI coding agents, and operational bots.

UPSTREAM SECURITY RESEARCH & OPEN SOURCE

- **LOLBAS Project (PR #525, Merged):** Authored official Windows defense-evasion technique via `Fsutil.exe file createnew` disk exhaustion (MITRE ATT&CK T1685 / T1562.001). Engineered the **BDB-Guardian** defensive monitor, formally cited as a recommended mitigation by **The Chinese University of Hong Kong (CUHK ITSC)**.
- **Red Canary · Atomic Red Team (PR #3433 & PR #3439, Merged):** Authored multi-platform KeePass credential discovery/exfiltration tests (T1555.005) and Windows Defender Antivirus disk-exhaustion impairment emulation in `%TEMP%` (T1685 / T1562.001).
- **magicsword-io · LOLRMM (PR #253, Merged):** Added AnyDesk custom client detection coverage, service normalization, EventLog 7045 telemetry, and Sigma detection rules (T1219).
- **Security Tooling Author:** Creator of `bugbounty-lab101` (490+ GitHub stars, HackerOne scope-gated workflow), `shodan_reconsx` (passive Shodan CTL enumerator), `cyhber-deploy` (AI DevSecOps review skill), and `dev101x-pentest-lab`.

EDUCATION

Master's in Artificial Intelligence

Universitat de Barcelona

2024 - Present

Specialization in generative models, autonomous AI agents, natural language processing, and computer vision.

Systems & Computer Engineering

Universidad Tecnológica de Bolívar

2017 - 2021

Software architecture, algorithms, computer networks, and technology project management.

Systems & Computer Technology

Universidad Tecnológica de Bolívar

2013 - 2017

Web and mobile application development, systems administration, and network infrastructure.

CERTIFICATIONS & TECHNICAL SKILLS

Offensive Security & SecOps: Penetration Testing, Red Teaming, Bug Bounty, MITRE ATT&CK, Sigma Rules, OWASP Top 10, Nmap, Burp Suite, Metasploit, Wireshark.

Programming & Applied AI: Python, Go (Golang), Bash, PowerShell, JavaScript (ES6+), SQL, LangChain, Autonomous AI Agents, Claude Code / MCP.

Fullstack, Mobile & Cloud: Laravel, Django, Flask, Vue.js, Flutter/Dart, Docker, Linux, Git/GitHub Actions, Cloudflare Workers, Supabase, Salesforce.

Credentials: Hack The Box Mini Pro Labs: **Mythical** (`HTBCERT-28139E357A`) & **Puppet** (`HTBCERT-CD631B515C`) | Salesforce Trailhead: **Ranger Rank** & Agentblazer (salesforce.com/trailblazer/yhenriquezblanquicett).
